

## Prenatal Screening Rates: Preliminary Data From Jan - Oct, 2020

Interpreting your numbers:

**Forms processed** - total number of forms for Orange County residents submitted to Healthy Start by your office, which should reflect the total number of your new OB patients

**Consent to Screen** - the number of patients who consented to be screened and completed the screening questions; the higher the consent-to-screen rate, the better job staff are doing in explaining the purpose and importance of completing the screening form

**Referrals** - the number of patients you've referred to Healthy Start, including those who score positive and for other reasons; providers are encouraged to refer all patients to let them learn about services & resources available to them

**Agree to Share Information** - the number of patients who have initialed "Yes" on the form to share screening form information, out of the number of patients who were referred; the patient cannot be contacted and services cannot be provided unless she initials "Yes"

**Offices with a very low number of forms processed are outlined in red as an indicator that you may not be in compliance with Florida Statute 383.14**

**Your office does not meet screening standards because your consent-to-screen rate is lower than 80!** Are your staff aware of screening requirements and do they understand the purpose of screening and services that are available? You may benefit from a staff training. Watch out if your number of forms processed is highlighted for being too low as this is a possible indicator that you are not in compliance with screening statutes.

**Your office is on track with a consent-to-screen rate between 80% to 89!** Watch out if your number of forms processed is highlighted for being too low as this is a possible indicator that you are not in compliance with screening statutes.

**Your office is an exemplary screener with a consent-to-screen rate of 90% or higher!** Keep up the great work, but watch out if your number of forms processed is outlined for being too low as this is a possible indicator that you are not in compliance with screening statutes.

**Training recommended** - if your office has not recently completed a training, has a low screening rate, a high volume of incomplete screening forms submitted and/or a low volume of forms submitted, a training is recommended. Complete online: [www.HealthyStartOrange.org/training](http://www.HealthyStartOrange.org/training) or call 407-342-8788.
